PROFESSIONAL EXPERIENCE

Laravel Developer Intern — D.Kedar Tech7 Pvt. Ltd.

June 2026 – September 2026 | Imadol, Lalitpur, Nepal

- Built and maintained dynamic, database-driven websites using Laravel, PHP, MySQL, Blade, JavaScript and jQuery.
- Implemented CRUD operations, migrations, seeders, Eloquent relationships, validation, authentication, middleware and CMS functionality.
- Developed reusable admin components for managing website content and used AJAX to improve admin usability.
- Built dynamic modules including banners, galleries, testimonials, products, blogs, company information, services and contact forms.
- Managed HTML content and sanitization for rich-text editors such as Summernote.
- Troubleshooted Laravel, database, routing, relationship, validation, image storage and URL issues using Git, DBeaver and Laravel Debugbar.
- Contributed to multiple client projects, including a blog website and live production websites.
- Worked with team leads and mentors to resolve issues while following existing project structures and requirements.

Web Development Intern — Civil Aviation Authority of Nepal (CAAN)

Nov 25, 2024 – Feb 4, 2025 | Sinamangal, Nepal

- Applied Laravel, PHP, MySQL, HTML, CSS and JavaScript in a real-world web development environment.
- Developed components for an airport informational website using Laravel MVC architecture, routing and controllers.
- Assisted in building a content management system (CMS) for managing airport information.
- Gained practical knowledge of web hosting and deployment.

PROFESSIONAL PROJECTS

Jibandeep Bahuuddeshiya · Agriculture Website

BACKEND & LARAVEL DEVELOPER

TECH: Laravel · PHP · MySQL · JavaScript | **DESIGN:** Team-lead supplied frontend design

- Integrated the team lead's frontend design into a dynamic Laravel application using Blade and MySQL.
- Built products, services, farm showcases, testimonials, news, posts and company information modules with an admin CMS.
- Implemented Eloquent models, relationships, migrations, seeders, validation and caching; resolved image storage and URL issues.

DK7 Dental · Dental Clinic Website

BACKEND & LARAVEL DEVELOPER

TECH: Laravel · PHP · MySQL | **DESIGN:** Team-lead supplied frontend design

- Turned the provided clinic design into a functional Laravel website with MySQL-managed content.
- Developed services, testimonials, projects, appointments, contact, company information and homepage modules.
- Built admin features for appointments and contact submissions; implemented sitemap, robots.txt, Open Graph metadata, Google Tag Manager and Google Analytics.

USAN Nepal · Live Production Website

BACKEND & LARAVEL DEVELOPER

TECH: Laravel · PHP · MySQL · JavaScript | **DESIGN:** Team-lead supplied frontend design

- Implemented the provided design as a database-driven Laravel production website using reusable Blade templates.
- Built CMS functionality for governance, sports & technology, committees, media center, services, programs, news and events.
- Developed backend CRUD and connected static frontend sections to admin-managed data using Eloquent, relationships, migrations, seeders and validation.

Universal Hygiene & Chemicals Industries Ltd. (UHCIL) · Live Production Website

BACKEND & LARAVEL DEVELOPER

TECH: Laravel · PHP · MySQL · JavaScript | **DESIGN:** Team-lead supplied frontend design

- Converted the provided design into a dynamic Laravel production website for an industrial products company.
- Developed products, commodities, brands, blogs, testimonials, company information and contact modules with CMS and admin CRUD.
- Worked collaboratively with the team lead and mentor to investigate and resolve complex application, database and validation bugs within the existing project structure.

Laravel Blog Website · Blog Platform

BACKEND & LARAVEL DEVELOPER

TECH: Laravel · PHP · MySQL · JavaScript | **DESIGN:** Team-lead supplied frontend design

- Built a dynamic blog platform by integrating the provided design with Laravel Blade and MySQL.
- Implemented posts, categories, tags, testimonials, galleries, education and company information modules.
- Built a CMS with authentication so administrators can create, update and manage content.
