PROFESSIONAL EXPERIENCE

Laravel Developer Intern — D.Kedar Tech7 Pvt. Ltd.

June 2026 – September 2026

Imadol, Lalitpur, Nepal

- Developed and maintained dynamic websites using Laravel, PHP, MySQL, Blade, JavaScript, jQuery.
- Implemented CRUD operations, database migrations, seeders, Eloquent relationships, validation, authentication, and CMS functionality.
- Developed reusable admin-panel components for managing website content, and used AJAX to improve admin-panel functionality and UX.
- Built dynamic sections including banners, galleries, testimonials, products, blogs, company information, and contact forms.
- Managed HTML content and sanitization for rich-text editors such as Summernote.
- Contributed to three client projects, including a blog website and two live production websites.
- Gained hands-on experience with debugging, deployment, Git, database management, and production-oriented Laravel applications.

Web Development Intern — Civil Aviation Authority of Nepal (CAAN)

Nov 25, 2024 – Feb 4, 2025

Sinamangal, Nepal

- Learned and applied Laravel, PHP, MySQL, HTML, CSS, and JavaScript in real-world web development.
- Developed components for an airport informational website using Laravel MVC architecture, routing, and controllers.
- Assisted in building a content management system (CMS) for managing airport information.
- Gained practical knowledge of web hosting and deployment.

Jibandeep Bahuuddeshiya — Agriculture Website *Laravel · PHP · MySQL · JavaScript*

- Converted the agriculture-focused frontend design provided by the team lead into reusable Laravel Blade templates and a functional, database-driven website.
- Developed dynamic sections for agriculture products, services, farm showcases, testimonials, news and posts, and company information using Laravel and MySQL.
- Implemented CMS and administrative functionality for managing website content through Laravel-based backend features and CRUD operations.
- Developed backend functionality using Laravel, PHP, Eloquent ORM, database relationships, migrations, seeders, validation, and caching.
- Integrated frontend components with Laravel backend functionality to transform static agriculture website designs into dynamic and functional sections.
- Implemented dynamic homepage functionality with database-driven hero sliders, farm showcases, services, testimonials, and posts.
- Troubleshoot application, database, image storage, URL, and production-related issues while maintaining the live website.
- Maintained and refined the website according to the existing project structure, frontend design, and technical requirements.

DK7 Dental — Dental Clinic Website *Laravel · PHP · MySQL*

- Converted the dental clinic frontend design provided by the team lead into reusable Laravel Blade templates and a functional, database-driven website.
- Developed dynamic sections for services, company information, testimonials, projects, appointments, contact information, and homepage content using Laravel and MySQL.
- Developed backend functionality using Laravel, PHP, Eloquent ORM, database relationships, migrations, seeders, validation, and middleware.
- Implemented database-driven appointment and contact management functionality through the administrative panel.
- Developed and maintained dynamic homepage components, including hero sections, services, testimonials, and other clinic information.
- Implemented website-related functionality including sitemap, robots.txt, Open Graph metadata, Google Tag Manager, and Google Analytics integration.
- Troubleshoot Laravel, database, validation, routing, middleware, and application-level issues during development.
- Maintained and refined the website according to the existing project structure, design, and technical requirements.

USAN Nepal — Live Website *Laravel · PHP · MySQL · JavaScript*

- Converted the frontend design provided by the team lead into reusable Laravel Blade templates and a functional, databasedriven production website.
- Developed dynamic website sections and database-driven functionality for governance, sports & technology, committees, media center, services, programs, news, and events.
- Implemented CMS and administrative functionality for managing website content through Laravel-based backend features and CRUD operations.
- Developed and maintained backend functionality using Laravel, PHP, MySQL, Eloquent ORM, database relationships, migrations, seeders, and validation.
- Integrated frontend components with Laravel backend functionality to transform static designs into dynamic and functional website sections.

Universal Hygiene & Chemicals Industries Ltd. — Live Website *Laravel · PHP · MySQL · JavaScript*

- Converted the frontend design provided by the team lead into reusable Laravel Blade templates and a functional, databasedriven website.
- Developed dynamic product, commodity, brand, blog, testimonial, company information, and contact sections using Laravel and MySQL.
- Implemented CMS and administrative functionality for managing website content through CRUD operations and database-driven interfaces.
- Developed backend functionality using Laravel, PHP, Eloquent ORM, migrations, seeders, database relationships, and validation.
- Integrated frontend components with backend functionality to make the provided static designs dynamic and functional.
- Troubleshoot Laravel, database, validation, relationship, and application-level issues encountered during development.

- Collaborated with the team lead and mentor to investigate complex issues, identify appropriate solutions, and resolve development problems.
- Maintained and refined functionality for the live production website while following the existing project structure, design, and technical requirements.

Laravel Blog Website *Laravel · PHP · MySQL · JavaScript*

- Converted the frontend design provided by the team lead into reusable Laravel Blade templates and a functional, databasedriven blog website
- Developed dynamic sections for posts, categories, tags, testimonials, galleries, education, and company information.
- Implemented CMS and administrative functionality for managing website content through CRUD operations and database-driven interfaces.
- Developed backend functionality using Laravel, PHP, MySQL, Eloquent ORM, migrations, seeders, authentication, validation, and Eloquent relationships.

ACADEMIC PROJECTS

Mind Games *.NET MAUI*

- Developed a mobile app with three algorithm-based games: Tic-Tac-Toe, 8 Puzzle, and N-Queen.
- Implemented Alpha-Beta Pruning for Tic-Tac-Toe move selection.
- Applied the A* search algorithm with a Manhattan Distance heuristic to solve the 8 Puzzle.
- Implemented Brute Force and Backtracking approaches for the N-Queen problem.

Online Food Ordering System *ASP.NET · MySQL*

- Developed a web-based food ordering system with authentication, order processing, and order history.
- Implemented database management using MySQL and backend functionality using ASP.NET.

Online Clothing Recommendation System *Django · MySQL*

- Built a content-based clothing recommendation system using cosine similarity between products.
- Managed user and product data using MySQL; trained and tested on a Kaggle dataset.

EDUCATION

Master of Computer Application (MCA) — *Patan Multiple Campus* 2026 – Present
Patan Dhoka, Lalitpur

- Expected Graduation: 2028

Bachelor of Computer Application (BCA) — *Patan Multiple Campus* 2021 – 2026
Patan Dhoka, Lalitpur

- Cumulative GPA: 3.40 / 4.00

+2 Management — *Capital Secondary School* 2018 – 2020
Koteshwor, Kathmandu

- Cumulative GPA: 3.10 / 4.00

SEE — *Kanjirowa National School* 2018
Koteshwor, Kathmandu

- Cumulative GPA: 3.05 / 4.00
